

Community Innovation Grant — Draft Application

Project: Digital Skills Access for Rural Youth

Applicant organization

Organization: BrightPath Community Foundation. We are a nonprofit organization based in Pune, India, working with underserved communities. Our authorized representative is Ananya Mehta, Program Director. Contact: ananya.mehta@example.org.

Project overview

The project will provide digital-skills workshops and refurbished laptops to rural youth. We plan to work with community centers and local volunteers.

Community impact

Our target community is rural students aged 16–22 who have limited access to computers. We expect to train 300 students and help at least 200 participants complete a practical digital-skills assessment.

Project duration

The project is planned for 10 months, beginning in January 2027 and ending in October 2027.

Implementation plan

Months 1–2: recruit trainers and partner centers. Months 3–8: deliver workshops. Months 9–10: conduct assessments and prepare the final report. The Program Director will coordinate delivery with local volunteers.

Budget

We request INR 18,00,000. Major costs include laptops (INR 8,00,000), trainer fees (INR 4,00,000), travel and workshops (INR 3,00,000), and monitoring/admin costs (INR 3,00,000).

Data protection

We will collect participant names, contact details, and assessment results. Access will be limited to project staff and data will be deleted after the project.

Sustainability

After the grant, we expect partner community centers to continue running the workshops with volunteers and locally available equipment.

Evaluation

We will track workshop attendance and assessment completion. We will review results at the end of the project.

Supporting documents

Registration certificate: available upon request. Authorized representative details are included above.

Additional claims

Our organization has already trained more than 5,000 rural students across India and has partnerships with 40 government schools.
